

Nancy Medina

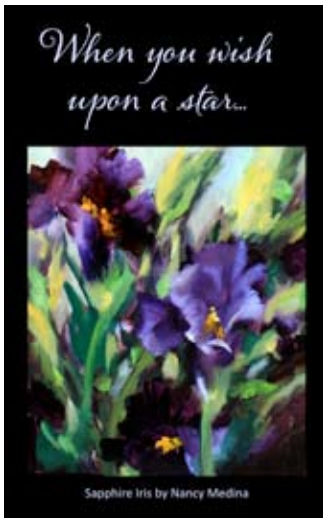

Nancy Medina Art Biography

NANCY MEDINA

The great American poet Ralph Waldo Emerson once said, “The earth laughs in flowers...” Texas artist Nancy Medina has found a way to express that statement through her art. Nancy is an award-winning artist whose oil paintings are collected around the world. Named as “one of today’s best floral and botanical artists...” by American Art Collector magazine, her impressionistic florals and landscapes depict rich color and draw in the viewer with a sense of vibrancy and movement. Known for her inspiring paintings of backyard flowers and large container gardens, Medina’s bold, impressionistic style is immediately eye-catching. The artist’s love of art and gardening originated on her childhood farm in Scurry, Texas, where her parents were organic gardeners long before organic gardening was in style. Her early memories include standing barefoot beneath 9-foot-tall sunflowers and seeing the light stream through the petals. Nancy studied art history and illustration at the University of London and painting and color theory at Texas A&M University. Today she resides with her husband and their 3 pugs in Flower Mound, Texas, where she paints daily from Flower Mound Art Studio.

You can see more of her work on her art blog at www.nancymedinaart.blogspot.com and on her web site at www.nancymedina.com .
